

To Whom It May Concern:

I am writing to let you know how important the K-LOVE radio station is in the entire Denver metro area. Every where I go I see one of their bumper stickers or hear the radio station's music and DJ's coming from people's homes and cars. This radio station is an important part of our every day. My family and I listen to this station on a continuing basis. If another secular radio station were to enter into this station, it would be just another station playing the same songs with the same message over and over. Having a radio station that plays music that DOESN'T focus only on smoking, drinking, partying, sex and drugs is VERY refreshing. If you take that away, what positive influence on the radio will my kids have? There aren't many positive media influences around anymore and taking the one we have away would be detrimental to us and to our youth. I have found that K-LOVE calms and soothes people as well as brings them together.

Thank you,
Jolene Gonzales
